You are using the default legacy behaviour of the `<class 'transformers.models.t5.tokenization_t5.T5Tokenizer'>`. This is expected, and simply means that the 'legacy' (previous) behavior will be used over the new behaviors introduced to the `<class 'transformers.models.t5.tokenization_t5.T5Tokenizer'>`. We recommend you to use `<class 'transformers.models.t5.tokenization_t5.T5Tokenizer'>` from now on.

/usr/local/lib/python3.12/dist-packages/transformers/convert_slow_tokenizer.py:166: UserWarning: The sentencepiece tokenizer that you are converting to a fast tokenizer uses the byte fallback option
